## Debate Competition

Subject: "Exploring the Future: Highlights of the Solo Debate Competition on Artificial Intelligence"

On 02/08/2024, our school organized a solo debate competition centered around the compelling topic of "Artificial Intelligence". The event was open to students for Grades 9 and 10, and it attracted a talented group of debaters eager to showcase their perspectives on this hotly debated issue.

Each participant had the opportunity to present their arguments individually, exploring the multifaceted nature of artificial intelligence (AI). The speeches covered a wide range of points, from the benefits of AI in advancing healthcare, education, and industry to the potential risks it poses in terms of job displacement, privacy concerns, and ethical dilemmas.

The judges, a panel of teachers with expertise in technology and ethics, evaluated the participants on the basis of content, delivery, and rebuttal skills.

The students' ability to critically analyse the dual aspects of AI and engage the audience was particularly commendable.

The competition not only highlighted the students' understanding of artificial intelligence but also encouraged them to think deeply about its implications for the future. The event was a testament to the intellectual curiosity and eloquence of our students, making it a memorable experience for all involved.

The solo debate competition was a resounding success, offering a platform for students to explore a critical contemporary issue. It helped participants and the audience gain a deeper understanding of artificial intelligence and its growing role in society, encouraging thoughtful reflection on its future impact.

Thank you,
